# TECHNICAL INFORMATION

Interior ERKADO doors is the collection of door wings that meets various expectations of our Clients. From the classical models, over universal, to modern ones. Our priorities are: quality, solid and reliable product, reasonable price and providing possibility to manage the configuration of a given model in terms of technology [STANDARD, SOFT, STILE, TWIN], decors, widths, filling, lock, ventilation and the choice of desired design. ERKADO offers, among others, very rich range of sliding system solutions both in-wall as well as on-wall, accompanied with all necessary accessories and technical support from our side. Other products that we are very much proud of are double doors and GRAF glass doors.

## BOARD TECHNOLOGY: STANDARD AND SOFT

**CONSTRUCTION:** MDF rails covered with two HDF boards

**WYPEŁNIENIE:** stabilising filling 'honeycomb core'

**FINISHING:**

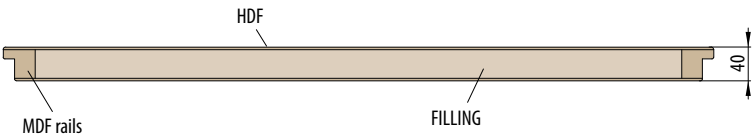

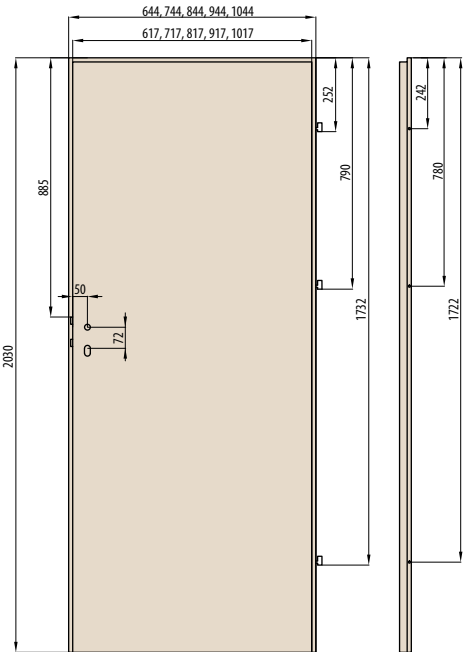

- HDF board covered with foil or CPL
- door leaf made in SOFT or STANDARD CPL technology

**HARDWARE:**

- two screw pintle hinges (honeycomb core stabilising filling)
- trzy zawiasy czopowe wkręcane (homalight board filling)
- lock for regular key, patent lock or bathroom lock

**GLAZING:**

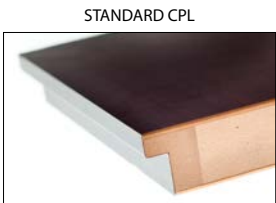

- decormat milk glass

**SOFT TECHNOLOGY** SOFT TECHNOLOGY is based on wrapping the flat surface as well as the door rebate with one piece of foil whose connection is performed in only one invisible point. Doors made in SOFT technology have no sharp edges what makes them look more esthetic and modern-like. The door leaf is covered with finish foil of higher resistance to scratches and so it improves and greatly influences on intensive exploitation. SOFT door leaf has additional vertical rails; it makes the construction more solid and this has significant importance with high glazed door leaves.

**STANDARD CPL TECHNOLOGY** STANDARD CPL TECHNOLOGY is based on wrapping the flat surface with the laminate CPL 0.2 mm thick highly resistant to scratches and friction. CPL laminate has numerous technical advantages. It is characterised with high resistance to hits, friction, scratches as well as high temperatures and UV radiation. Applying this type of material allows for the exploitation of doors in so called 'hard' spaces [open to high temperatures, humidity or excessive use]. In door leaves made in STANDARD CPL technology we apply three hinges.

# TECHNICAL INFORMATION

## STILE TECHNOLOGY

**CONSTRUCTION:** MDF rails and stiles covered with GREKO foil or CPL.

**WYPEŁNIENIE:** HDF boards 4 mm thick covered with GREKO foil or CPL

**HARDWARE:**

- three silver pintle hinges regulated horizontally
- lock for regular key, patent lock or bathroom lock

**GLAZING:**

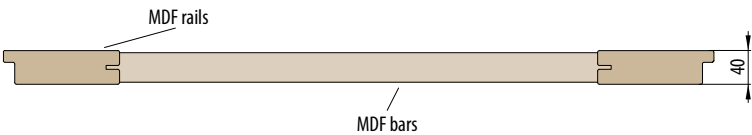

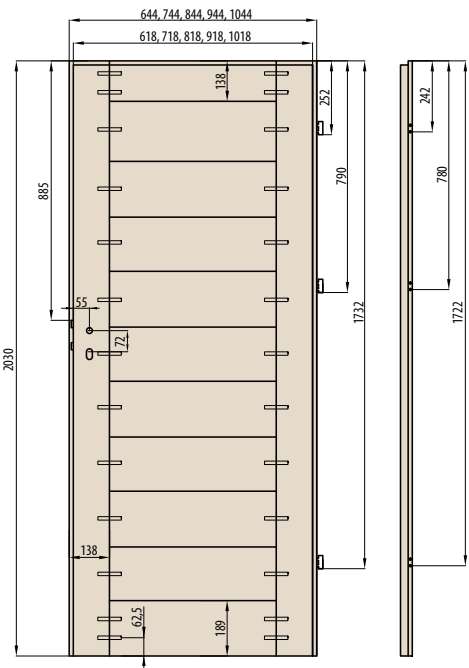

- hardened milk glass lub VSG 221 milk protective glass

**STILE TECHNOLOGY**  
STILE door leafs are characterised with exceptionally solid construction because not only the rail but stiles are all made of full MDF. The production involves new TECHNOLOGY of wrapping the door leaf without visible connections of the foil. Bigger weight of door leaf, solid construction, lack of visible foil connections, using two pintle hinges and professional production process are only some of the factors influencing greatly upon the esthetics and quality of the product.

**STILE CPL TECHNOLOGY** is based on wrapping the flat surface and well as door rebate with the laminate CPL 0.2 mm thick highly resistant to scratches and friction. CPL laminate has numerous technical advantages. It is characterised with high resistance to hits, friction, scratches as well as high temperatures and UV radiation. Applying this type of material allows for the exploitation of doors in so called 'hard' spaces [open to high temperatures, humidity or excessive use].

## TWIN TECHNOLOGY

**CONSTRUCTION:** two genuine MDF board pressed and covered with PVC

**HARDWARE:**

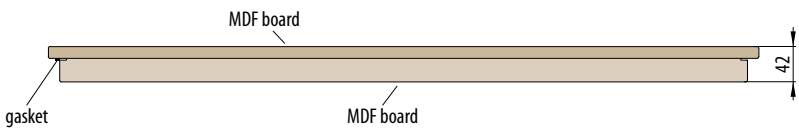

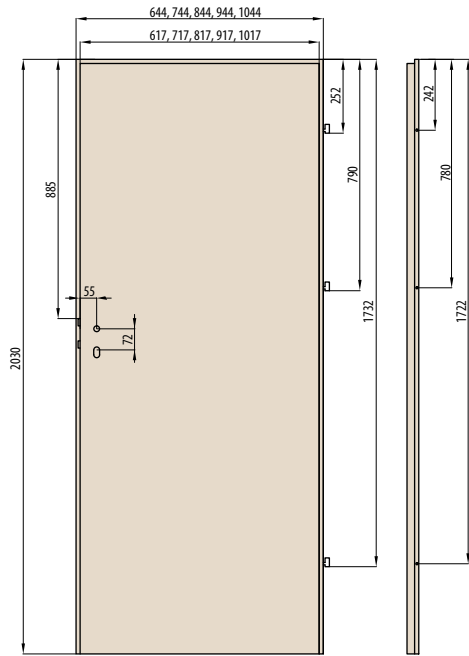

- three silver pintle hinges regulated horizontally
- lock for regular key, patent lock or bathroom lock

**GLAZING:**

- VSG 331 milk protective glass

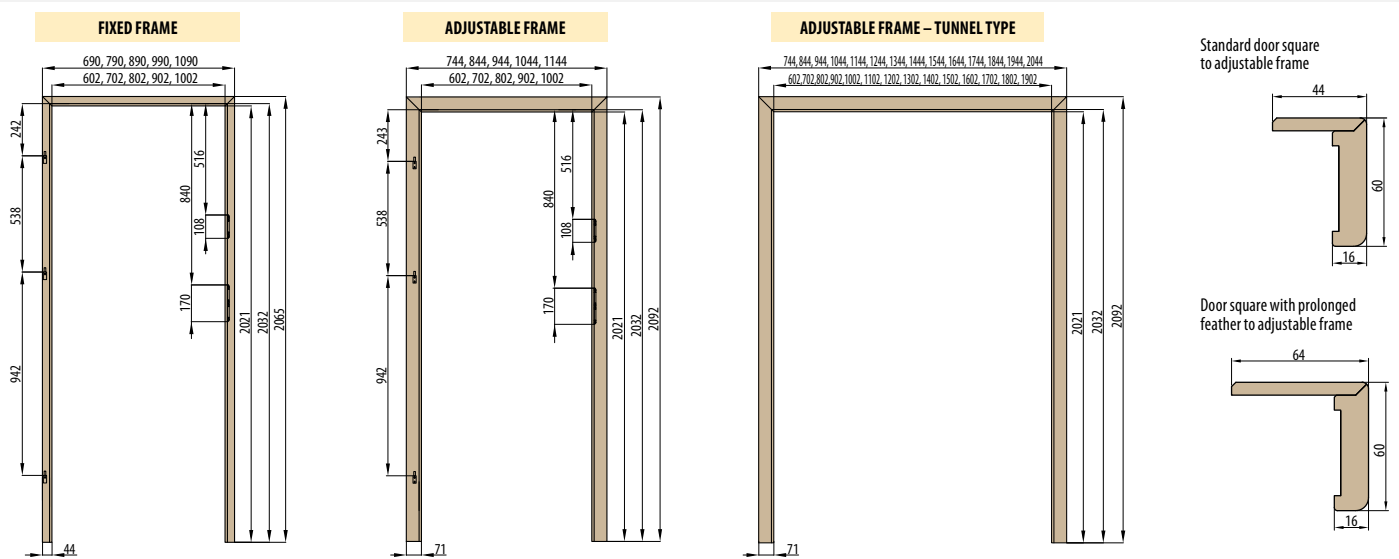

**CONSTRUCTION** of hybrid TWIN door leafs allows for receiving much greater esthetics as well as resistance to excessive use. Two genuine boards covered with PVC foil 0.7 mm thick make up for a unique and solid construction resistant to scratches and operation of extreme temperatures, humidity and detergents.

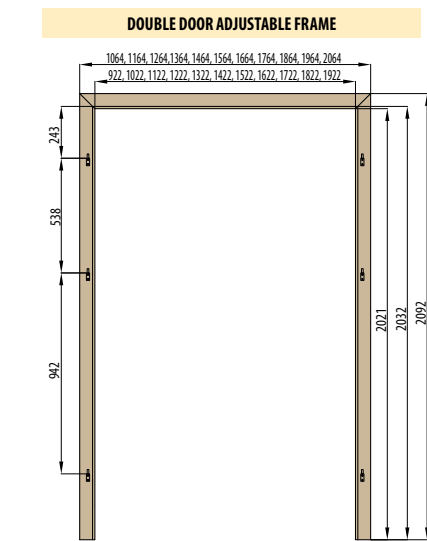

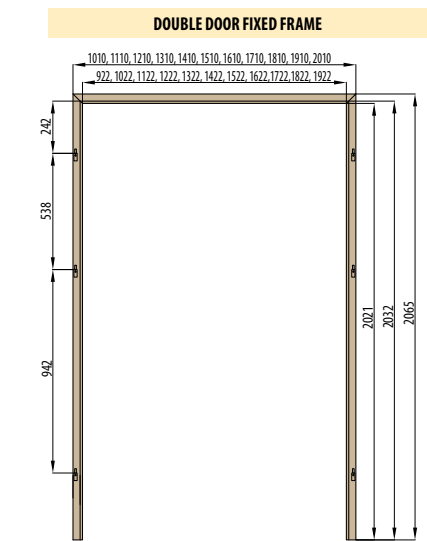

# TECHNICAL INFORMATION

## FRAMES

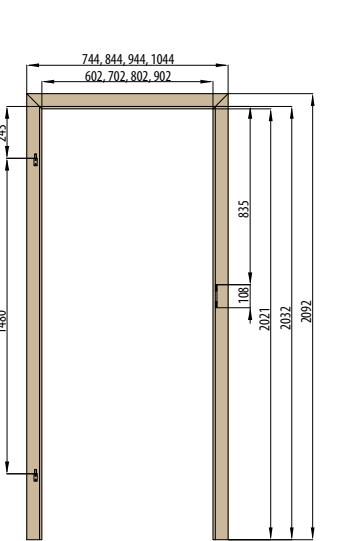

- Adjustable and fixed frame could be applied to all kinds of ERKADO interior doors made in STANDARD, SOFT, STILE and TWIN technologies.
- The frame is made of high quality MDF and covered with solid foil imitating wood structure.
- Depending on the technology, the frames are respectively covered with the following: finish foil, GREKO foil, CPL laminate and PVC
- All frames to STILE, board doors, STANDARD CPL and hybrid TWIN door leaves have additional third hinge.
- Each set of the adjustable and fixed frame consists of the following: elements of the frame, bolts and screws. The particular elements have ready holes made in the connection spaces.
- Each set includes guarantee card and the instruction of assembly.

## DOUBLE DOOR FRAME

## GLASS DOOR FRAME

## TUNNEL TYPE OF FRAME

Tunnel frame is an adjustable frame or fixed frame without any hardware. It is constructed with one horizontal and two vertical beams. It can be applied to decorate in-door spaces as the element of protection to wall edges. Nevertheless more often it is used for the esthetical reasons as the decoration of the whole interior. Adjustable or fixed tunnel frame are also used in ERKADO sliding systems.

DEPENDING ON THE SYSTEM WE DIFFERENTIATE:

TUNNEL TO SP1N	TUNNEL FRAME TO SINGLE ON-WALL SLIDING SYSTEM
TUNNEL TO SP2N	TUNNEL FRAME TO DOUBLE ON-WALL SLIDING SYSTEM
TUNNEL TO SP1C.100	TUNNEL FRAME TO SINGLE IN-WALL SLIDING SYSTEM TO CASSETTE 100 WIDE
TUNNEL TO SP2C.100	TUNNEL FRAME TO DOUBLE IN-WALL SLIDING SYSTEM TO CASSETTE 100 WIDE
TUNNEL TO SP1C.125	TUNNEL FRAME TO SINGLE IN-WALL SLIDING SYSTEM TO CASSETTE 125 WIDE

# IN-WALL SLIDING SYSTEM

■ ERKADO offers the following types of in-wall sliding systems:

SP1C.100	SINGLE IN-WALL SLIDING SYSTEM TO CASSETTE 100 WIDE available only to STILE door leafs and model UNO plain
SP2C.100	DOUBLE IN-WALL SLIDING SYSTEM TO CASSETTE 100 WIDE available only to STILE door leafs and model UNO plain
SP1C.125	SINGLE IN-WALL SLIDING SYSTEM TO CASSETTE 125 WIDE
SP2C.125	DOUBLE IN-WALL SLIDING SYSTEM TO CASSETTE 125 WIDE
SP1C.ZN	SINGLE IN-WALL SLIDING SYSTEM TO WALL MOUNTING TO CASSETTE 125 WIDE
SP2C.ZN	DOUBLE IN-WALL SLIDING SYSTEM TO WALL MOUNTING TO CASSETTE 125 WIDE

■ Standard set of in-wall single/double sliding system includes the following elements:

- aluminium cassette [LEON] SP1 - price of cassette to single system
- aluminium cassette [LEON] SP2 - price of cassette to double system-
- non-rebate door leaf/two non-rebates door leafs - price of standard door leaf/prices of two door leafs

of the cassette 125 wide

# ON-WALL SLIDING SYSTEM

## ON-WALL SLIDING SYSTEM

- SINGLE SP1N
- DOUBLE SP2N

**Price comprises:**  
Aluminium rail with masking box in the colour of door leaf:  
– 200 cm long to doors 90, 100  
– 180 cm long to door 80  
– 150 cm long to doors 70, 60

- Available configurations of on-wall sliding systems:**
- rail with masking box
  - rail with masking box + borderer with gasket (only to SP1N)
  - rail with masking box + tunnel frame
  - rail with masking box + tunnel frame + borderer with gasket (only to SP1N)

It is not possible to have ventilation cut in non-rebated door leaves to in-wall sliding system.

## ACCESSORIES TO BE CHARGED ADDITIONALLY

- Adjustable tunnel frame in the price of adjustable frame
- hook lock with hardware  
only to single system
- round or oval holder in gold or silver colour  
set comprises two pieces
- synch system  
system that allows for opening and closing two non-rebate door leaves equally at the same time by using only one door leaf.  
only to SP2N
