

DPE-70 | DPE-70 +

The high standard of the modern installment

Product description

Windows often chosen by customers with very good parameters of thermal and acoustic insulation. The full equipment includes innovative fitting with microventilation, four stage tilt mechanism and anti burglary catches in each sash of the tilt turn window, and also thermal glass and strong aluminum handle. In the version of DPE-70+ window sash is half facing the frame.

The rounded edge of the profile gives windows a modern, dynamic look.
